

ASIA Global Risk Risk Management Consultancy

OUR SERVICES – RISK PREVENTION AND MITIGATION

Our goal at Asia Global Risk is to help businesses to minimize risks to their operation and reputation, allowing them to focus on their company's development without avoidable disruptions. We emphasize the benefits of preventative solutions – foreseeing risks before they develop into issues and taking the necessary steps to mitigate their potential effects. This being the case, companies do sometimes find themselves in unexpected situations and where this happens our services can prove invaluable. We are one of the most effective companies in the region for incident/crisis management, leveraging our team's extensive experience in order to secure the best possible resolution for our clients.

PREVENTION

Background Checks

Ensuring the integrity of your workforce, making sure you have the full picture when hiring staff or putting people in critical positions.

Security Auditing

Identifying weak points in your physical and technological security infrastructure, closing gaps before they become problems

Consultancy

Offering expert advice on all aspects of operational and reputational risk management, ensuring you have effective processes in place.

ISSUE/CRISIS MANAGEMENT

We can assist you if you are or suspect you may be being subjected to:

Fraud

Dishonesty from suppliers, employees or clients to gain unfair advantage.

Misuse of information

Provision of sensitive information to competitors.

Blackmail

Threats made to gain money or influence.

Embezzlement

Inappropriate diversion of company assets.

OUR EXPERTISE

Asia Global Risk is the partner of choice for numerous companies from Europe, North America and East Asia, helping them to manage the operational risks that frequently arise when expanding into new markets and doing business in foreign environments.

Whether taking pre-emptive measures to protect our clients from future disturbances or responding quickly to immediate issues, Asia Global Risk is trusted to best serve our clients' interests. Our effectiveness is founded upon four core attributes:

- **CLIENT FOCUS.** Each case that we take on is somewhat bespoke, and the different ways in which our clients choose to run their businesses means that certain elements are more critical than others for different companies. Before devising our operational plan, our first course of action is always to form a deep understanding of our clients' requirements and to ensure that our services are orientated towards ensuring that those needs are met.
- **EXPERIENCE.** We hire only the most experienced operatives who have a proven track record in gaining and analyzing pertinent information, solving problems and getting the right results. With backgrounds in public investigation agencies and private protection services, our team has the operational and technological expertise required to secure optimal outcomes.
- **DISCRETION.** To truly deliver excellent results we need to work closely with our clients. Much of our work is return business with past clients who place their trust in us due to our proven track record in handling confidential information and dealing with sensitive issues discreetly.
- **RELATIONSHIPS.** We maintain excellent relationships in the countries that we operate in, both with public authorities and within the private sector. We are a trusted partner of the enforcement agencies of the countries that we work in, regularly being invited to conduct training seminars with the authorities and stressing the mutual interests we have in eliminating malicious activity that can deter investment in their economies. Just as important, we cooperate with the authorities in a transparent manner and are fully compliant with applicable legislation such as the UK Bribery Act and Foreign Corrupt Practices Act.
